

Friends & Family

A short-term opportunity, offered only to people we trust.

Everyone is talking AI. Nobody understands data — the fuel it runs on. This has always been a picks and shovels play. Build the infrastructure layer. We worked it out over six years. We built the Data Valuation Platform.

WHAT'S HAPPENING RIGHT NOW

- 16+ sovereign nations engaged — Isle of Man signed via royal decree, Ghana, Tanzania, Zanzibar, Brazil and others progressing quickly.
- Harvard, MIT, and Stanford professors collaborating on our longevity dataset and writing policy since last year — circulating among ambassadors and exceeding expectations.
- Hosting the Knowledge Innovation Summit at the UN General Assembly, October 7–9.
- The platform was completed last year. We go to market the first week of July.
- We were our own insurance broker last year. We will be our own insurance company next quarter.

THE SHORT-TERM PROBLEM

- Investor 1: \$500K — serious health conditions.
 - Investor 2: \$500K — revenue and capital strangled by war.
- This is why we've opened a small round. This is only being offered to friends and family.

THE ASK

Amount sought	€500,000 to €2,000,000 — small checks welcome.
Immediate relief	€100,000 to €200,000 gets us out of the bind right now.
Valuation	€20,000,000 — severely undervalued at current stage.
F&F discount	50% discount, locking in at €10,000,000 today before everything changes next quarter.
Duration	6 months — the term protects everyone.
Annual interest	8% to 12%.
Convertible	Converts to equity at €20M — or at €10M for friends & family.
Structure	Convertible note or direct investment — whichever you prefer.

WHAT CHANGES NEXT QUARTER

The ASRI dataset	\$300M+ longevity data asset — the most important dataset of its kind. Embryos in transit. Landing in 6–12 weeks. This goes onto our balance sheet and the valuation picture changes completely.
The insurance wrap	The \$100M dataset is wrapped with a data-linked insurance product. We draw down debt against the wrapped asset. No more equity. Dilution stops here.
Isle of Man	Regulatory structure established via royal decree — the mechanism through which the ASRI dataset is recognised and realised on the balance sheet.
Model going forward	Debt only. No equity dilution.

OUR LEAD INVESTORS

Mike Moran	Founder of Go-Jek.
Justin Viles	Founded Google and YouTube in Australia.
Andy	Founder of the fourth largest tech company out of Australia — dual NASDAQ listing this year.
Andy Poppink	Global Head of Strategy and Acquisitions, Jones Lang LaSalle.
Alan Laubsch	Global pioneer in impact investing — led the world's first tokenisation of carbon credits.

GLOBAL CREDIBILITY AND POLICY INFLUENCE

- Active partnerships with professors at Harvard, MIT, and Stanford.
- Publications in motion — world-first study on space effects on female reproduction.
- Hosting the Knowledge Innovation Summit at the UN General Assembly, October 7–9.
- Multiple academic institutions and global experts engaged. Ready for a dozen more sovereign nations after the General Assembly.
